Professional Summary

AI-Augmented Full Stack Developer candidate pursuing B.Tech in Computer Science Engineering (Blockchain Technology), with hands-on experience building responsive web applications and RESTful backend systems using React.js, JavaScript, Node.js, Express.js, and MongoDB. Strong foundation in Data Structures, Algorithms, SQL, database relationships, computer networks, computer organization and architecture, and software development fundamentals. Interested in leveraging AI-assisted development workflows to build reliable, scalable, and user-focused full-stack applications.

Education

Parul Institute of Engineering and Technology **2023–2027**
B.Tech in Computer Science Engineering (Blockchain Technology) *CGPA: 7.49*

Technical Skills

- **Programming Languages:** Java, C, C++, JavaScript, SQL
- **Frontend:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap
- **State Management:** Redux, Redux Toolkit
- **Backend:** Node.js, Express.js, REST APIs, RESTful Backend Development
- **Databases:** MongoDB, SQL, Database Relationships
- **Developer Tools:** Git, GitHub, Terminal, Linux/DOS
- **Computer Science:** Data Structures, Algorithms, Computer Networks, Computer Organization and Architecture
- **Problem Solving:** Data Structures and Algorithms in Java

Experience

Lab Tech Support – CV Raman Center, Parul University **Feb 2026–Mar 2026**

- Managed infrastructure supporting 3000+ systems during GATE and JAM examinations.
- Configured domains, networks and systems ensuring reliable operations.

IT Intern – System Support Cell, Parul University **Sept 2025–Feb 2026**

- Maintained university IT infrastructure and enterprise devices.
- Supported networking, troubleshooting and deployment activities.

Projects

SaaS Product Landing Page with Interactive Pricing & Demo *React.js, JavaScript, Tailwind CSS*

- Developed a responsive SaaS product landing page using React.js, JavaScript, Tailwind CSS, and reusable component-based architecture.
- Implemented an interactive pricing section with dynamic plan selection, feature comparison, and real-time UI updates to improve user engagement.
- Created reusable React components for navigation, pricing cards, feature sections, CTAs, and demo interactions, improving maintainability and scalability.Optimized the responsive interface for desktop, tablet, and mobile devices using Tailwind CSS utility classes and modern frontend development practices.

Full Stack REST API Application *Node.js, Express.js, MongoDB, React.js*

- Developed a full-stack web application using React.js for the frontend and Node.js with Express.js for RESTful backend development.
- Designed REST API endpoints for application data management and integrated MongoDB for persistent data storage.
- Implemented frontend state management using Redux and Redux Toolkit to manage application data and user interactions efficiently.
- Structured database collections and relationships to support efficient data organization and reliable backend operations.

Achievements

- Solved 350+ LeetCode problems with Contest Rating of 1620.
- Active on Codeforces, CodeChef and HackerRank.

Certifications

- Blockchain and its Application – NPTEL
- Artificial Intelligence: Concepts and Techniques – NPTEL
- Computer Network and Internet Protocol – NPTEL
