Professional Summary

Aspiring DevOps Engineer pursuing B.Tech in Computer Science (Blockchain Technology) with hands-on experience in Linux systems, Docker, Git, networking, cloud-native applications, and infrastructure support. Strong foundation in CI/CD concepts, system administration, microservices architecture, automation, and problem solving through competitive programming.

Education

Parul Institute of Engineering and Technology, Vadodara 2023 – 2027
B.Tech in Computer Science Engineering (Blockchain Technology) CGPA: 7.49

Technical Skills

Languages: Java, Python, JavaScript, Bash, C++
DevOps Tools: Docker, Git, GitHub, Linux, Postman
Cloud & Infrastructure: AWS Fundamentals, Virtualization, Networking, System Administration
CI/CD: GitHub Actions, CI/CD Concepts, Deployment Pipelines
Monitoring: Logging, Performance Monitoring, Infrastructure Troubleshooting
Databases: MongoDB, PostgreSQL, MySQL
Concepts: Microservices, REST APIs, Distributed Systems, Containers, Networking, OS

Experience

Lab Tech Support – CV Raman Center, Parul University Feb 2026 – Mar 2026
- Managed infrastructure supporting 3000+ systems during GATE and JAM examinations.
- Configured network environments, domains, and system deployments ensuring high availability.
- Assisted in troubleshooting hardware, software, and network-related issues.

IT Intern – System Support Cell, Parul University Sept 2025 – Feb 2026
- Maintained university-wide IT infrastructure and network operations.
- Configured printers, scanners, projectors, and enterprise systems.
- Supported system administration, device integration, and operational reliability.

Projects

DemandFlow AI – Cloud Native Demand Forecasting Platform
- Designed a scalable microservices architecture using FastAPI, Node.js, PostgreSQL, Kafka, Redis, and WebSockets.
- Containerized application services and optimized communication between distributed components.
- Implemented event-driven workflows, real-time processing, and scalable backend infrastructure.

SecureRxChain – Blockchain Supply Chain Platform
- Built a full-stack distributed application using React.js, Node.js, MongoDB, and Ethereum smart contracts.
- Developed secure APIs and automated workflows for product lifecycle tracking.
- Implemented transparent and tamper-resistant transaction management.

Achievements

- Solved 130+ Data Structures and Algorithms problems on LeetCode.
- Achieved LeetCode Contest Rating of 1620.
- Active Competitive Programmer on Codeforces, CodeChef, and HackerRank.
- Strong problem-solving skills in debugging, optimization, and system reliability.

Certifications

- Blockchain and its Application – NPTEL (Issued May 2026)
- Artificial Intelligence: Concepts and Techniques – NPTEL
- Computer Network and Internet Protocol – NPTEL
- Introduction to IoT – Cisco
